

AIR ACTIVATED

Our warmers are activated upon exposure to Oxygen... As soon as you open them!

LASTS FOR UP TO 10 HRS

Once your warmer has been activated, it can keep you toasty for up to 10 hours.

WARM IN 5 MINUTES

Give your warmer a shake, and enjoy a consistent temperature of 58°C In just 5 minutes.

100% NATURAL OXIDATION

Simple, clever and 100% natural chemical reactions are the key to our warmers.

What's in it?

- When exposed to oxygen, the iron in the pouch oxidizes and makes your warmer toasty.
- When the iron oxidizes, it produces iron oxide, AKA: Rust!
- The salt works as a catalyst to speed up the process, and the carbon helps to disperse heat.
- The Vermiculite is an insulator, keeping all the warmth in the bag.
- All the magic ingredients are sealed safely inside a little polypropylene bag.
- The polypropylene allows oxygen to permeate the ingredients whilst retaining any moisture.

IRON POWDER
ACTIVATED CHARCOAL
VERMICULITE
WATER
SALT
